 caesarstone® | **PORCELAIN**

Your home. A new perspective.

Caesarstone Porcelain offers a new point of view. It marks a leap in technology, functionality, and design for premium surfaces.

Caesarstone Porcelain embodies innovative properties that elevate each high-performing slab for the ultimate experience. Infinite possibilities open up for making the perfect personal statement with a captivating interplay of versatile colours, tactile textures, and dynamic movements. Appearance and practicality combine to give people the freedom to choose and the flexibility to create their dream space.

Caesarstone Porcelain delivers a high degree of durability and strength for added safety and peace of mind that boosts dynamic living and creativity, indoors and outdoors.

By blending delicate beauty and reinforced strength, Caesarstone's cutting-edge knowhow is packed into three physical properties that set the bar for porcelain worktops.

Caesarstone Porcelain sparks the imagination, taking a whole new turn with remarkable designs that are extremely hard-wearing, highly resistant, and exceptionally beautiful. These next-generation worktops reinvent surface design, expressing the world around us by unleashing the power and passion for design through innovation.

Caesarstone Porcelain introduces three innovative properties that set the bar for porcelain worktops:

**Forward
Design.**

**High-Heat
Structure.**

**Fortified
Frame.**

Forward Design.

The Forward Design achieves striking colour schemes, bolder veins, palpable textures, and magnified patterns in breakthrough surfaces that are simple to care for and maintain, in Honed or Ultra Rough finishes that accentuate their design.

510 Impermia

High-Heat Structure.

The High-Heat Structure forms a resilient surface that is extremely resistant to high temperatures. The blend of natural ingredients secures UV resistance for outdoor use.

506 Mirabel

Fortified Frame.

A Fortified Frame provides an extremely hard surface, incredibly resistant to scratches, pressure, and cracks, enabling it to stand up to the most demanding high-volume use.

516 Locura

Reinventing surface design

Caesarstone Porcelain reinvents surface design, celebrating the unique properties of porcelain to embody the natural elements of marble and stone, and the industrial aspects of concrete and metal, expressing the world around us.

The Porcelain Collection presents a remarkable new aesthetic that is redefining kitchen countertops, with richer colours, bolder designs, larger patterns, and wonderful tangible textures for both interior and exterior applications. This was made possible through Caesarstone's design expertise and an advanced slab production method that harnesses cutting-edge technology and stems directly from in-depth curation and research.

Work on the new collection involved a lengthy mapping phase, which started with a broad study of trends that encompassed not only kitchens, but also fashion, the home, colours, materials, and much more. Then the smaller details became the focus of attention, explains Mor Krisher, Caesarstone's Chief Designer:

"Refining the arteries, working on the colours, and playing with the textures – a lot of work goes into every single detail until we achieve the perfect result."

For example, the new collection exhibits a clear focus on bolder designs with delicate blue and green capillaries, dominant arteries that take on a romantic interpretation, resembling sea foam, and an industrial concrete look featuring warmer colours, among others.

"We took the stone back to its roots – to a raw, warm, earthy place – in a range of colours, from delicate tones and pastels to warm, dramatic, and bold shades. Our goal was to emphasise the stone's materiality rather than attempt to flatten it, as the feeling should be natural above all.

"Porcelain worktops celebrate the unique properties of the material, embodying the natural elements of marble and stone, as well as the industrial aspects of concrete and metal. We refine the nuances of the finer details, which express the human touch evident in any Caesarstone work surface. Porcelain can achieve almost any desired natural look, as found in one material or another."

Beyond aesthetics, there is functionality. Porcelain offers a surface that supplies maximum protection against scratches, chips, and stress cracks.

Thanks to a high-temperature production process, Caesarstone's porcelain worktops are resistant to extreme heat, as well as UV, sunlight, and extreme weather conditions, making them particularly suitable for outdoor use. They are also stain resistant, easy to clean with just soap and water, and ensure almost effortless maintenance.

"Kitchen surfaces require a sense of robustness and longevity. Even the most dedicated followers of interior trends need to choose one they can enjoy for the next 10 years. That's why it is so important to select a worktop that delivers the perfect combination of uncompromising durability with timeless style."

"Designing our new porcelain collection was like entering a theme park: thanks to our innovative use of this material, our customers can now opt for all the intricacies they wanted but could never previously enjoy in the same product. Now there are no limits."

Mor Krisher
Chief Designer

The Supernatural Collection

505 Archetta

A comprehensive suite of evocative Porcelain surfaces inspired by the limitless beauty of nature.

The extended Supernatural Collection marks an aesthetic milestone for contemporary surfaces, combining the spirit of nature with the improved performance of Caesarstone Porcelain.

The collection expresses the complexity, emotion and uniqueness of natural stone while delivering superior quality and durability. Taking inspiration from diverse geographies, cultures, architecture and interior trends, Caesarstone's design team capture the timelessness of marble, granite, slate and travertine and interpret them for modern luxury lifestyles.

The collection showcases 15 new designs unique to Caesarstone with a breadth of tones and colourways. Ranging from the crisp, pure white of 501 Snowdrift, accentuated by delicate golden-brown veins that float across its misty base, to the deep midnight base of 511 Smokestone, characterised by its chalky flashes of white, adding dimension and direction, beautified by finer veining that dances in the background.

From the subtlety of 504 Lumena, to the striking impact of 513 Striata, that explores the geographic processes of weathering over millennia, the Supernatural Collection demonstrates the hallmark of the brand's design prowess. A new reflection of the natural world, Porcelain offers a window to explore diverse motifs influenced by our continued search for inspiration in the external environment and the delicate craftsmanship of human intervention.

The Metropolitan Collection

412 Beige Ciment

A diverse collection of Porcelain designs that celebrate the industrial aesthetic.

Caesarstone's award-winning Metropolitan Collection is enhanced with the introduction of five new surfaces that offer designers and homeowners increased opportunities to explore the urban look.

The next step in the brand's creative reinterpretation of modernist industrial architecture, each of the designs offer an unpolished, ultra-rough interpretation of robust construction finishes and materials found in factories, industrial lofts and urban infrastructure. The Metropolitan Collection offers a captivating translation of authentic textures of raw manufacturing for both domestic and commercial environments.

Poured concretes are explored with a softer touch, with the cloud-toned, tactile 413 White Ciment, and the creamy 412 Beige Ciment, offering a rugged patina combined with an organic warmth. Metallic materials are also redefined in Caesarstone Porcelain; with the debut of 302 Metallio Black, an evocative design that evokes the transformative process of leads and iron when exposed to extreme heat with a smoky patina that floats across a graphite-toned base.

Each of these five designs represents Caesarstone's continued pursuit of radical new experiences for interior environments, creating high performance surfaces with a tactility and blend of aesthetics that reflect new possibilities without compromising on the brand's trusted performance.

The Classico Collection

110 Whitenna

Three elegant monochromatic shades that provide a classic foundation for any interior.

The Classico collection spans the limits of pure lightness and deepest darkness, with 110 Whitenna and 130 Darma, with a versatile dark slate offering in 570 Magnate.

Whitenna captures the stark essence of pure minimalism, used for interiors and exteriors that seek simplicity and functionality. Ideally suited for smaller rooms, Whitenna expands kitchen spaces and erases the boundaries in domestic design, achieving the most perfect white possible, whilst adapting to diverse applications like offices, food courts and lobbies, bringing a fresh hue to hospitality and architecture alike.

Darma's intense contemporary black shade is enhanced by its unpolished, honed finish. Darma is perfect for sleek kitchens and bathrooms, as worktops and coverings, working equally well when contrasted by other materials in the home. On a larger scale, Darma casts a mysterious spell on fashionable eateries and commercial spaces, turning offices into landmarks, stores into flagships and transforming design hotels into places to be.

Magnate is a calm and fresh interpretation of slate that captures a younger spirit, its warm tone is an antidote to cold minimalism, acting like a natural form of concrete, organic in essence yet urban in style. Magnate's base is stippled with small clay grains and dark grey flecks, mixed with lighter particles to recreate the fine coarseness of stone. Its organically textured Ultra Rough finish reflects a trend for tactile materials in interiors, in contemporary, urban-styled residential settings as well as lofts, bars and public areas of larger developments themed to the industrial aesthetic.

Surfaces for indoors and outdoors

High performance surfaces
engineered for interior and
exterior spaces

Caesarstone Porcelain has been designed for increased strength, aesthetic beauty and extreme heat resistance. With a blend of natural materials, our surfaces are resilient to the elements and UV resistant, making Caesarstone Porcelain surfaces the perfect foundation for both outdoor and indoor spaces.

More than ever before, we are looking for a closer connection to nature and the outside world, and in doing so, we are discovering the joys of outdoor living. As homeowners, we want to elevate our outdoor spaces, turning them into more permanent environments that can be enjoyed year-round, extending our living areas and enhancing our quality of life. From a fully equipped outdoor kitchen in a country garden to a sleek BBQ station on a city apartment terrace, or a sophisticated al fresco dining area in a suburban home, however you imagine your dream outdoor space, Caesarstone Porcelain will help you bring your vision alive.

Designed and tested to withstand the sun's rays and the most extreme conditions year after year, our porcelain surfaces provide the answer for every homeowner's desire to cook, dine and entertain from the comforts of their own outdoor space. With 23 designs, unique to Caesarstone, homeowners and designers are offered the versatility to design an exterior space that meets with their own personal style.

Advantages

Scratch Resistant

Impressive scratch-resistance strength, not susceptible to scrapes or scuffs

Extreme-Heat Resistant

Withstands very high temperatures and extreme weather conditions

Nonporous

Incredibly impenetrable, dense, and resilient, for long-lasting quality

Stain Resistant

Highly impenetrable surface that is nonporous, made to resist staining and easy to maintain

Indoor & Outdoor

Resistant to UV exposure and extreme weather conditions, suitable for any space

Hygienic

Nonporous, inhibits the growth of bacteria, mild, or mildew, remains safe and sanitary for ultimate cleanliness

Care and Maintenance

Virtually maintenance free, Caesarstone's hard, nonporous surfaces are simple to clean and require no sealing to renew their lustre. In most cases, soap and water or a mild detergent is enough to keep your Caesarstone surfaces looking like new. If necessary, you can use a non-abrasive soft soap along with a non-scratch or delicate scrub pad. Afterwards, thoroughly clean with water to remove residue. Please note that Caesarstone finishes other than polished may require increased daily maintenance due to their distinctive appearance.

Order Samples

Request samples by visiting caesarstone.co.uk/samples. Some variation in colour and pattern can occur. We always recommend viewing a full slab or product installation as part of your selection process. Samples represent only a small area of the overall colour scheme and may not be illustrative of the entire pattern, texture or tone that can occur across the full slab. Images, including illustrations of full slab patterns and colours can be found at caesarstone.co.uk

Quality Standards

Caesarstone has received worldwide recognition for its commitment to quality, safety and environmental standards. Each one of our surfaces is carefully inspected to ensure that it meets the highest level of international quality standards. Our surfaces come with a lifetime warranty on domestic installations and are backed by professional customer service and support.

Warranty

For added peace of mind, Caesarstone products come with a lifetime Residential Warranty.

Our Slab Sizes

Caesarstone Porcelain surfaces come in one Standard size.

Std. size

160 cm x 320 cm
(63" x 126")

Thickness

1.2 cm

Std. slab weight

150-160kg /
331-353 lbs

Weight / M2

27-31 kg /
59-68 lbs

Available Edges

Eased

Miter

All Caesarstone slabs come with a standard engineered cut, ready for experienced fabricators to fabricate the surface to your specifications after cutting the perimeter. Your surface's edge profile can be custom-designed by any fabricator in a variety of thicknesses that inspire your design. Choosing the right edge profile for your specific design style and aesthetic adds the all-important finishing touches to your surface and optimises your design.

Our Finishes

Each porcelain surface has been crafted in one distinct finish, either Honed or Ultra Rough, to bring out the best in its design while ensuring it remains long-lasting without the need for sealant or wax.

Honed

Smooth to the touch and soft on the eye, Honed finish offers a special organic luminosity. Its satin sheen reflects light, while retaining a special shine that penetrates the surface to highlight deeper dimensions.

Ultra Rough

Our most tactile finish, Ultra Rough, is a breakthrough innovation designed exclusively to bring a unique granular touch to porcelain. By adding a dimension of materiality that is authentic to patinas found on crude rocks, natural marbles, and industrial metals or concrete, light reflected from each surface enhances its organic nuances while ensuring the highest durability for ease of care.

Easy fabrication and reliable service

Caesarstone Porcelain has been engineered for a smooth, reliable and efficient fabrication process reducing the cost of installation for commercial projects and home-owners.

The unique properties of Caesarstone's Porcelain Collection have been developed to offer worktop fabricators and stonemasons the smoothest of fabrication processes.

Unlike other porcelain, ceramic or sintered stone surfaces, Caesarstone Porcelain has been designed with a Fortified Frame for increased strength and durability.

In addition, Caesarstone recognises that fabricators expect comprehensive guidance for the cutting, polishing and installation of its Porcelain surfaces, which is why we have updated our extensive Caesarstone University guidance information as part of our rigorous Master of Stone training and education programme.

Developed over decades of work with skilled stone fabricators, our Master of Stone programme includes detailed guides for working with Caesarstone Porcelain, and offers a detailed reference point for the worktop fabrication industry.

Furthermore, in-market technical expertise is available should you require any further information on fabricating Caesarstone Porcelain.

“Caesarstone Porcelain cuts like a dream. The material stays strong under the saw, and offers a quicker cutting process, reducing the cost of fabrication and installation for our clients”
